

INTERNATIONAL BASIC MUSCULOSKELETAL ULTRASOUND COURSE AND BASIC MRI ANATOMY

27th & 28th March 2011 (16 hours of CME)

General Information

This course fulfills the requirements for EULAR Basic Musculoskeletal Ultrasound Course and will be certified by the Malaysian Association of Sports Medicine. It is suitable for Radiologists, Rheumatologists, Sports Medicine Physicians, Rehabilitation specialists, Pain specialists and Orthopaedic Surgeons and Trainees who want to learn Musculoskeletal Ultrasound Anatomy and MRI Anatomy so they can show patients abnormalities reported by radiologists. It is also suitable for physicians who want to buy a medium end ultrasound machine for screening to ensure they have the correct diagnosis to institute appropriate therapy. A range of ultrasound machines will be available to test for yourselves. The course will reduce unnecessary referrals for MSK MRI which can be solved by using MSK ultrasound.

The course will emphasize practical tips and pearls not found in textbooks. The faculty consists of well-established teachers and trainers from South East Asia. Accurate diagnosis based on clinical history and imaging findings will be highlighted. Unlike other courses, this course teaches MRI correlation of ultrasound findings.

In addition to a worthwhile course, the location of the conference hotel at the heart of the golden tourist beach area of Batu Ferringhi in Penang, will certainly make your trip more memorable. Just step out of the hotel and you will be greeted by street shops selling clothes, bags, DVD's, shoes and household ornamental items at bargain prices. The Penang night food is also world famous.
